# #Colour my Adventure

We at Nordisk love the outdoors and love to travel. We have experienced great camps and communities all over the world. But nowhere as in Japan we have seen how tent-users style and personalise, not only their Nordisk Legacy tents, but their entire camps – and it looks fantastic!

Inspired by this, it is with great pride that we introduce the latest addition to the Nordisk Legacy gear - a range of Nordisk Mini tents & tarps. All of which are substantially lighter than what we have ever made before in Legacy range, but at the same time they are as comfortable, trendy, high quality and prepared for "Hygge" as you expect from a Nordisk tent or tarp.

All Minis pack perfectly into the specially designed rucksacks Yggdrasil and Ygg and enable you to head off into nature to enjoy your own adventure!

And to spice up the concept further, we have made space for your own creativity, enabling you to style and colour your camp exactly as you would like it to be!

**We call the concept: Colour my Adventure.**

## **Personalizing tents now starts at the shop - which colour(s) do you like?**

Each Mini tent & tarp comes in two packages. One of them holding the Mini tent or tarp itself – the shell – and the other one - the Colour Pack - holding all essential accessories you would need for set-up – the poles, the pegs and the guy lines. With this creative split we offer you a great variety of coloured add-on-parts you can choose from and equip your Mini tents and tarps with. And if you want to change something about your Mini tent or tarp – you can just go for another Colour Pack for your existing tent or tarp and re-invent your camp easily!

## **The best of two worlds - light in weight, yet comfortable and cosy.**

With the new Mini tents & tarps we have taken the best ideas from our Nordisk Legacy tents and our Nordisk Leisure range and created a whole new fabric & material concept. We substantially reduce weight and packing size, but maintained comfort and stability. For our "Colour My Adventure" range we found a one-off mix of lightweight aluminium poles, pegs & trims and lightweight, rain resistant fabrics which all have a nice cotton look and feel to them.

Aluminium  
poles &  
pegs

Light, airy  
quick dry  
fabrics

Each

tent under  
6.0 kgs

## Tent and tarp key features

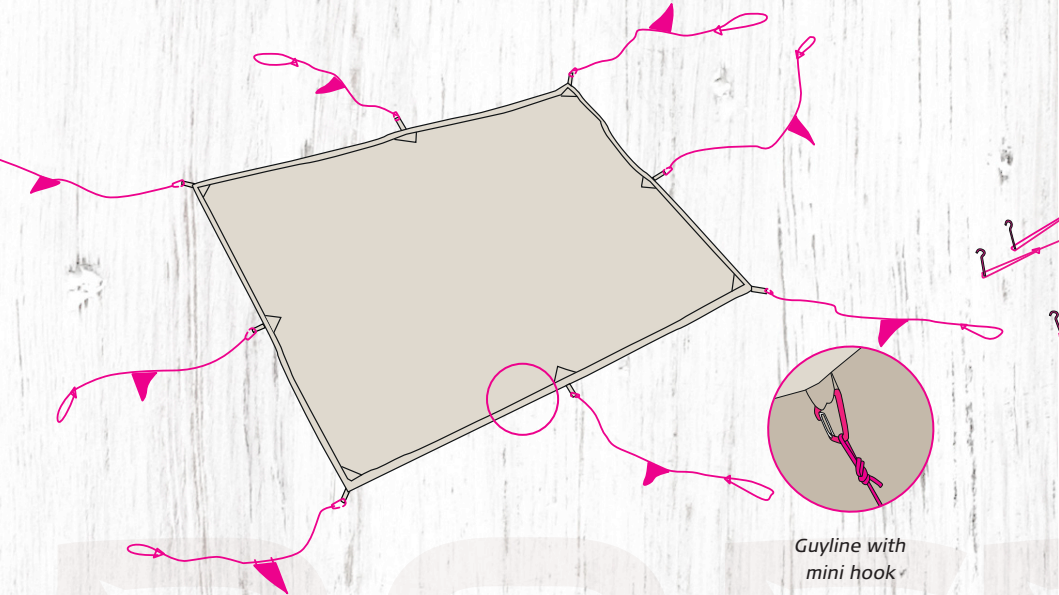

- Personalise & colour your camp over and over again
- Low in weight & with best packability
- Quick dry TN (Technical Nylon) tent roofs with taped seams
- Airy TC (Technical Cotton) tent walls and tarp roof for nice climate
- Sewn-in bathtub floor\*
- Many ventilation options: mesh windows and vents\*
- Extendable vestibule(s) for more comfort & better gear storage\*
- Different colour packs to choose from and personalise tents & tarps, including:
- Lightweight aircraft grade Aluminium poles & pegs
- Reflective guy lines with triangle pocket for line storage & camp safety
- Many colourful accessories available for even more colour at your campsite
- Each tent & tarp fits into one of the special design backpacks Ygg & Yggdrasil

\*Asgard Tech Mini & Ydun Tech Mini only

## BUILD UP INSTRUCTION - KARI MINI

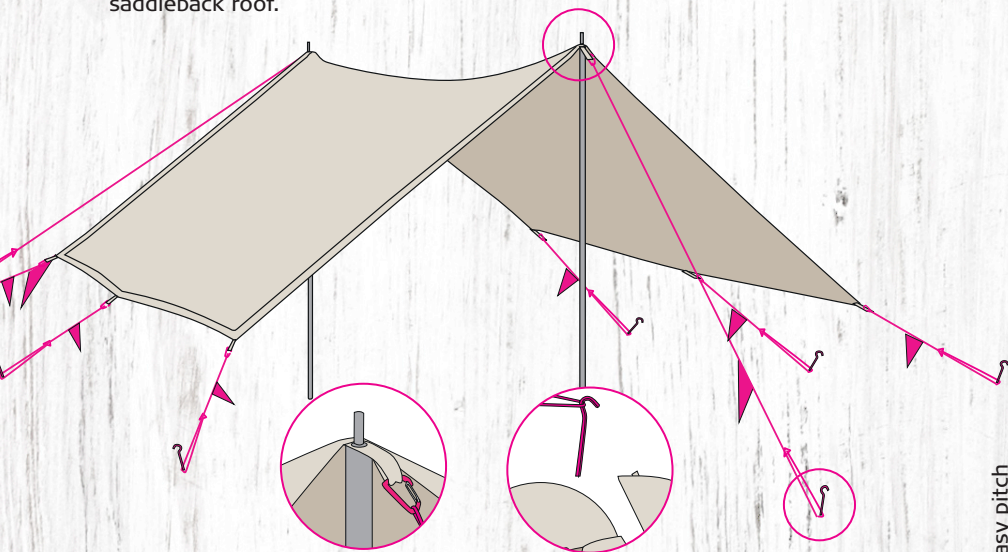

- 1 Bring your Kari Mini tarp and your Kari Mini Colour Pack - or your Colour Packs, if you have more than one - to the camp site. Take the tarp out of its pack and all poles, pegs and guy lines from the Colour Pack. Spread out the tarp on an even surface without any sharp objects.

Take all guy lines from the colour kit and attach them to the webbing loops by using the mini hook on each guy line.

Guyline with  
mini hook

- 2** Take the first of the two poles from the Colour Pack and insert its top pin into the eyelet of the central webbing on the long edge of the tarp. Peg out the guy line pre-attached to this central webbing loop. Do the same with the second pole on the opposite side of the tarp. After that, peg out all remaining guy lines to the ground. If needed - adjust guy lines to create more tension throughout the tarp surface and on the tarp ridge. You now have created a classical saddleback roof.

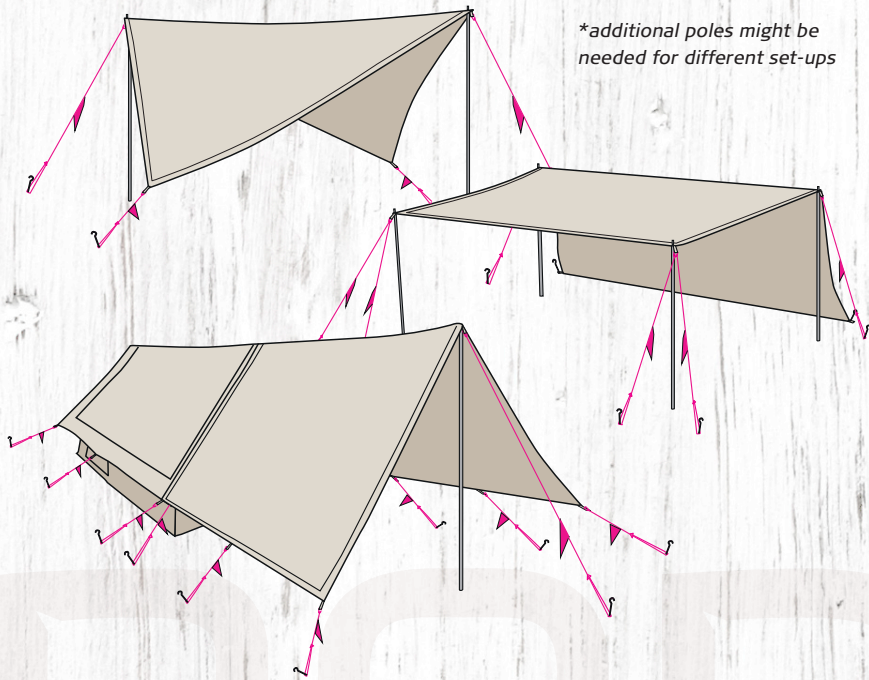

*Pole through eyelet  
on webbing*

*Peg all guy lines out*

**F** Of course there are many different ways\* to put up your Kari Mini tarp, of which we only want to highlight a few more in this product book. Instead of using the central webbing points for inserting the poles, you can also choose to insert the poles at 2 of the tarp corners to form a diagonal roof ridge with triangular roof flaps - which is perfect to provide sun shade. You can also set your Kari tarp up as a wind screen at the beach or use it as a canopy above the entrance of your Ydun Tech Mini or your Asgard Tech Mini tent.

*\*additional poles might be needed for different set-ups*

# TAKE CARE OF YOUR NORDISK MINI TENT AND TARP

## In the Camp

- make sure you pitch on an even and big enough surface
- remove sharp rocks and sticks that could harm the tent floor
- stretch the tent as much as possible for optimal strength and water repellency
- if wet or very windy, you need to re-adjust the tension of the guy ropes
- if very windy, use extra guy ropes and pegs for stability
- put the packsack somewhere where you can find it again
- avoid fire and smoke near the tent – be aware of wind directions!
- keep an eye on guy rope tension once in a while
- remove all traces of your camp when you go

## Living with your tent

- do not use any sort of coating – a clean tent has the best water repellency
- keep it clean with a soft sponge or brush
- use no harsh chemical cleaning or machine washing
- keep it dry, and if packed down wet, remember to dry it as soon as possible – remember that a wet tent is heavier than a dry one
- store in dry surroundings
- check guy ropes and pegs once in a while, and buy new ones if damaged
- if you have damaged poles, your local Nordisk dealer can supply new ones
- be aware that long exposure of sunlight can degrade the fabric
- love and nurse your tent. If you protect your tent, it will protect you
